

WHAT IS CLAIMED IS:

1. An anaerobic curable composition comprising:

- (a) a compound having at least one radically polymerizable functional group in its molecule thereof;
- (b) an organic peroxide;
- (c) o-benzoic sulfimide; and
- (d) a complex of a metal other than alkali metals and ethylenediaminetetraacetic acid, or a complex of a metal other than alkali metals and diethylenetriaminepentaacetic acid.

2. The anaerobic curable composition according to claim 1, wherein

- the component (b) is contained in an amount of from 0.1 to 5 parts by weight,
- the component (c) is contained in an amount of from 0.1 to 5 parts by weight, and
- the component (d) is contained in an amount of from 0.01 to 2 parts by weight, each based on 100 parts by weight of the component (a).

3. The anaerobic curable composition according to claim 1 or 2,

wherein the metal other than alkali metals is selected from the group consisting of Mg, Ca, Ti, V, Cr, Mn, Fe, Co, Ni, Cu, Zn, Al, and Ag.
